

# Individual Choices

To help you discuss your wishes with your surgeon and to help them guide you through the process, Allergan has in-licensed\* an interactive computer-based consultation program which takes into account both your individual needs and your expectations to identify the implants which are just right for you. This is called the BioDynamic™ system.

With Allergan's comprehensive range of breast implants to choose from and the exclusive BioDynamic™ program helping you feeling informed and confident about the options you are considering, you and your surgeon can plan the way to the new you.

The BioDynamic™ system is only available through selected and approved clinics.

Because you  
are individual

A personalised approach  
to selecting the breast  
enhancement implant  
that's right for you

For more information about the BioDynamic™ approach to breast enhancement, ask your surgeon.

# Individual Women

Every woman is different and has different desires and needs. If you are thinking about surgery for breast enhancement, information sharing during the consultation is a crucial step.

At Allergan we also understand the wide range of physical differences and personal preferences which is why we offer the widest range of breast implants available in different styles and shapes, to help you achieve the look you want.

# Planning for satisfaction with BioDynamic™

The BioDynamic™ consultation program is designed to allow you to look into the future, and see how the new you may look if you decide to go ahead with surgery.

1. Talking – Listening – Understanding

3. Implant selection and visualisation of potential result

2. Capturing your specific measurements

4. Take a look in the mirror
